(20 pts)

Prior Experience With:	Circle One: (0: None, 5: Some, 10: Considerable)
Java	0 1 2 3 4 5 6 7 8 9 10
Web Front End (HTML/CSS/JavaScript)	0 1 2 3 4 5 6 7 8 9 10
Real World Software Development (writing applications for users other than yourself)	0 1 2 3 4 5 6 7 8 9 10
Git/Github	0 1 2 3 4 5 6 7 8 9 10

Your task is to meet with four random classmates from within your same section, and ask them these questions. They will also interview you, asking the same question (in each round). You don't have to write down everything they say: just a summary.

(20 pts) Person #1 Name:

Question: A team is a group of people with a common goal that depend on one another.

Think about an experience you had with a successful team (in school, or out of school--any context). What are two things that made that team successful?

1)

2)

Turn over for your interviews with persons 2, 3, 4, 5

(20 pts) Person #2 Name:

Question: When working on a project with other students, if you have to get a lot of work done together, what time of day / day of week works best for you this quarter? And why?

(20 pts) Person #3 Name:

Question: Employers and recent graduates tell us that group work is important to prepare you for the skills you need. But sometimes group/pair work doesn't go well. Think of a time when you had a bad experience with group/pair work. What went wrong?

1)

2)

(20 pts) Person #4 Name:

Question: Now, think about two things you most want from fellow team members to be successful on the team project in this class. What are those two things, and why?

1)
